

Hawaii

NAEP testing data as well as state assessment results reveal moderate excellence gaps for Black, Hispanic and Free and Reduced Lunch Eligible (FARM) students.

According to NAEP proficiency data, the Excellence Gap in Math between White students and both Black and Hispanic students in Grade 4 increased between 2003 and 2011. However, the gap between Grade 4 White and Black students in Reading decreased significantly during the same period, as did the gap in above average scores. In contrast, the gap in above average scores in Grade 4 between White and Hispanic Math students increased.

The Excellence Gap between FARM and non-FARM students in both Grade 4 and Grade 8 Math increased between 2003 and 2011. Though both groups increased the percentage of students at the advanced level, the increase was greater for non-FARM students. The gap in scores at the above average level for Grade 4 students also increased in both Math and Reading between 2003 and 2011. However, the gap between FARM and non-FARM students in Reading Grade 8 in 2011 was the same level as 2003.

Hawaii does not provide state-level assessment data disaggregated according to achievement level.
